# INTRODUCTION

## 1 INTRODUCTION

The Carrier Transicold model 69NT40–551 series units are of lightweight aluminum frame construction, designed to fit in the front of a container and serve as the container front wall.

## 2 CONFIGURATION IDENTIFICATION

Unit identification information is provided on a plate located near the compressor. The plate provides the unit model number, the unit serial number and the unit parts identification number (PID). The model number identifies the overall unit configuration while the PID provides information on specific optional equipment, factory provision to allow for field installation of optional equipment and differences in detailed parts.

Configuration identification for the models covered herein is provided in the Carrier Transicold Container Unit Matrix at [www.container.carrier.com](http://www.container.carrier.com).

## 3 OPTION DESCRIPTIONS

Various options may be factory or field fitted to the base unit. These options are listed in the tables and described in the following subparagraphs.

### 3.1 Battery

The refrigeration controller may be fitted with standard replaceable batteries or rechargeable battery pack.

### 3.2 Dehumidification

The unit may be fitted with a humidity sensor. This sensor allows setting of a humidity set point in the controller. In the dehumidification mode the controller will operate to reduce internal container moisture level.

### 3.3 Control Box

The control box is composite material and may be fitted with a lockable door.

### 3.4 Temperature Readout

The unit may be fitted with suction and discharge temperature sensors. The sensor readings may be viewed on the controller display.

### 3.5 Pressure Readout

The unit is fitted with standard suction and discharge transducers. The transducer readings may be viewed on the controller display.

### 3.6 USDA

The unit may be supplied with fittings for additional temperature probes which allow recording of USDA Cold Treatment data by the integral DataCORDER function of the Micro-Link refrigeration controller.

### 3.7 Interrogator

Units that use the DataCORDER function are fitted with interrogator receptacles for connection of equipment to download the recorded data. Two receptacles may be fitted, one accessible from the front of the container and the other mounted inside the container (with the USDA receptacles).

### 3.8 Remote Monitoring

The unit may be fitted with a remote monitoring receptacle. This item allows connection of remote indicators for COOL, DEFROST and IN RANGE. Unless otherwise indicated, the receptacle is mounted at the control box location

### 3.9 Communications.

The unit may be fitted with a communications interface module. The communications interface module is a slave module which allows communication with a master central monitoring station. The module will respond to communication and return information over the main power line. Refer to the ship master system technical manual for further information.

### 3.10 Compressor

The unit is fitted with a scroll compressor with either standard piping (equipped with suction, discharge, economizer and oil return service valves) or with semi-hermetic piping (equipped with suction, discharge and economizer service connections).

### 3.11 Condenser Coil

The unit is fitted with a 4 row coil using 7mm tubing.

### 3.12 Autotransformer

An autotransformer may be provided to allow operation on 190/230, 3phase, 50/60 hertz power. The autotransformer raises the supply voltage to the nominal 380/460 volt power required by the base unit. The autotransformer may also be fitted with an individual circuit breaker for the 230 volt power.

If the unit is fitted with an autotransformer and communications module, the autotransformer will be fitted with a transformer bridge unit (TBU) to assist in communications.

### 3.13 Temperature Recorder

The unit may be fitted with an electronic recorder manufactured by Partlow Corporation.

### 3.14 Gutters

Rain gutters may be fitted over the control box and recorder section to divert rain away from the controls. The different gutters include standard length bolted gutters, extended length gutters and riveted gutters.

### 3.15 Handles

The unit may be fitted with handles to facilitate access to stacked containers. These handles may include fixed handles (located at the sides of the unit) and/or a hinged handle at the center (attached to the condenser coil cover).

### 3.16 Thermometer Port

The unit may be fitted with ports in the front of the frame for insertion of a thermometer to measure supply and/or return air temperature. If fitted, the port(s) will require a cap and chain.

### 3.17 Water Cooling

The refrigeration system may be fitted with a water cooled condenser. The condenser is constructed using copper-nickel tube for sea water applications. The water cooled condenser is in series with the air cooled condenser replaces the standard unit receiver. When operating on the water cooled condenser, the condenser fan is deactivated by either a water pressure switch or condenser fan switch.

### 3.18 Back Panels

Back panel designs that may be fitted include panels of aluminum and stainless steel. Panels may be fitted with access doors and/or hinge mounting.

### 3.19 460 Volt Cable

Various power cable and plug designs are available for the main 460 volt supply. The plug options tailor the cables to each customer's requirements.

### 3.20 230 Volt Cable

Units equipped with an autotransformer require an additional power cable for connection to the 230 volt source. Various power cable and plug designs are available. The plug options tailor the cables to each customer's requirements.

### 3.21 Cable Restraint

Various designs are available for storage of the power cables. These options are variations of the compressor section front cover.

### 3.22 Upper Air (Fresh Air Make Up)

The unit may be fitted with an upper fresh air makeup assembly. The openings may also be fitted with screens.

### 3.23 Lower Air (Fresh Air Make Up)

The unit may be fitted with a lower fresh air makeup assembly. These assemblies are supplied in two designs, the standard design and the macro design. The openings may also be fitted with screens.

### 3.24 Controlled Atmosphere

The units may be fitted with the TransFresh option.

For information on the TransFresh system, contact TransFresh Corporation, P.O. Box 1788, Salinas CA 93902

### 3.25 Evaporator

The unit is fitted with an evaporator coil and a hermetic thermal expansion valve.

### 3.26 Evaporator Fan Operation

The units are fitted with Normal Evaporator Fan Operation, opening of an evaporator fan internal protector will shut down the unit.

### 3.27 Labels

Operating Instruction and Function Code listing labels will differ depending on the options installed. For example, additional operating instructions are required to describe start-up of a unit equipped with an autotransformer. Where the labels are available with additional languages, they are listed in the parts list.

### 3.28 Plate Set

Each unit is equipped with a tethered set of wiring schematic and wiring diagram plates.

The plate sets are ordered using a seven digit base part number and a two digit dash number. **(See Unit Matrix)**

### 3.29 Controller

Two different controllers are available:

1. Remanufactured - Controller is the equivalent of a new OEM controller and is supplied with a 12 month warranty.

2. Repaired - Controller has had previous faults repaired and upgraded with the latest software.

Note: Repaired controllers are NOT to be used for warranty repairs only full OEM Remanufactured controllers are to be used.

Controllers will be factory equipped with the latest version of operational software, but will NOT be configured for a specific model number and will need to be configured, at the time of installation or sale.

### 3.30 Stepper Drive

All the units covered by this manual have suction modulating valves which act to control system capacity. Units indicated as being fitted with "stepper drive" have digital control motors fitted to the suction modulating valve to open and close the valve in steps as required.

### 3.31 Condenser Grille

Two styles of condenser grilles are available, direct bolted grilles and hinged grilles.

## Ordering Instructions

All orders and inquiries for parts must include: Parts Identification Number (**PID**), Model Number, Unit Serial Number, Part Number, Description of part as shown on list and Quantity required. Address all correspondence for parts to the following address:

CARRIER TRANSICOLD DIVISION  
 Replacement Components Group, TR-20  
 P.O. Box 4805, Syracuse, New York 13221  
 or FAX to: (315) 432-3778

## Letter Designations

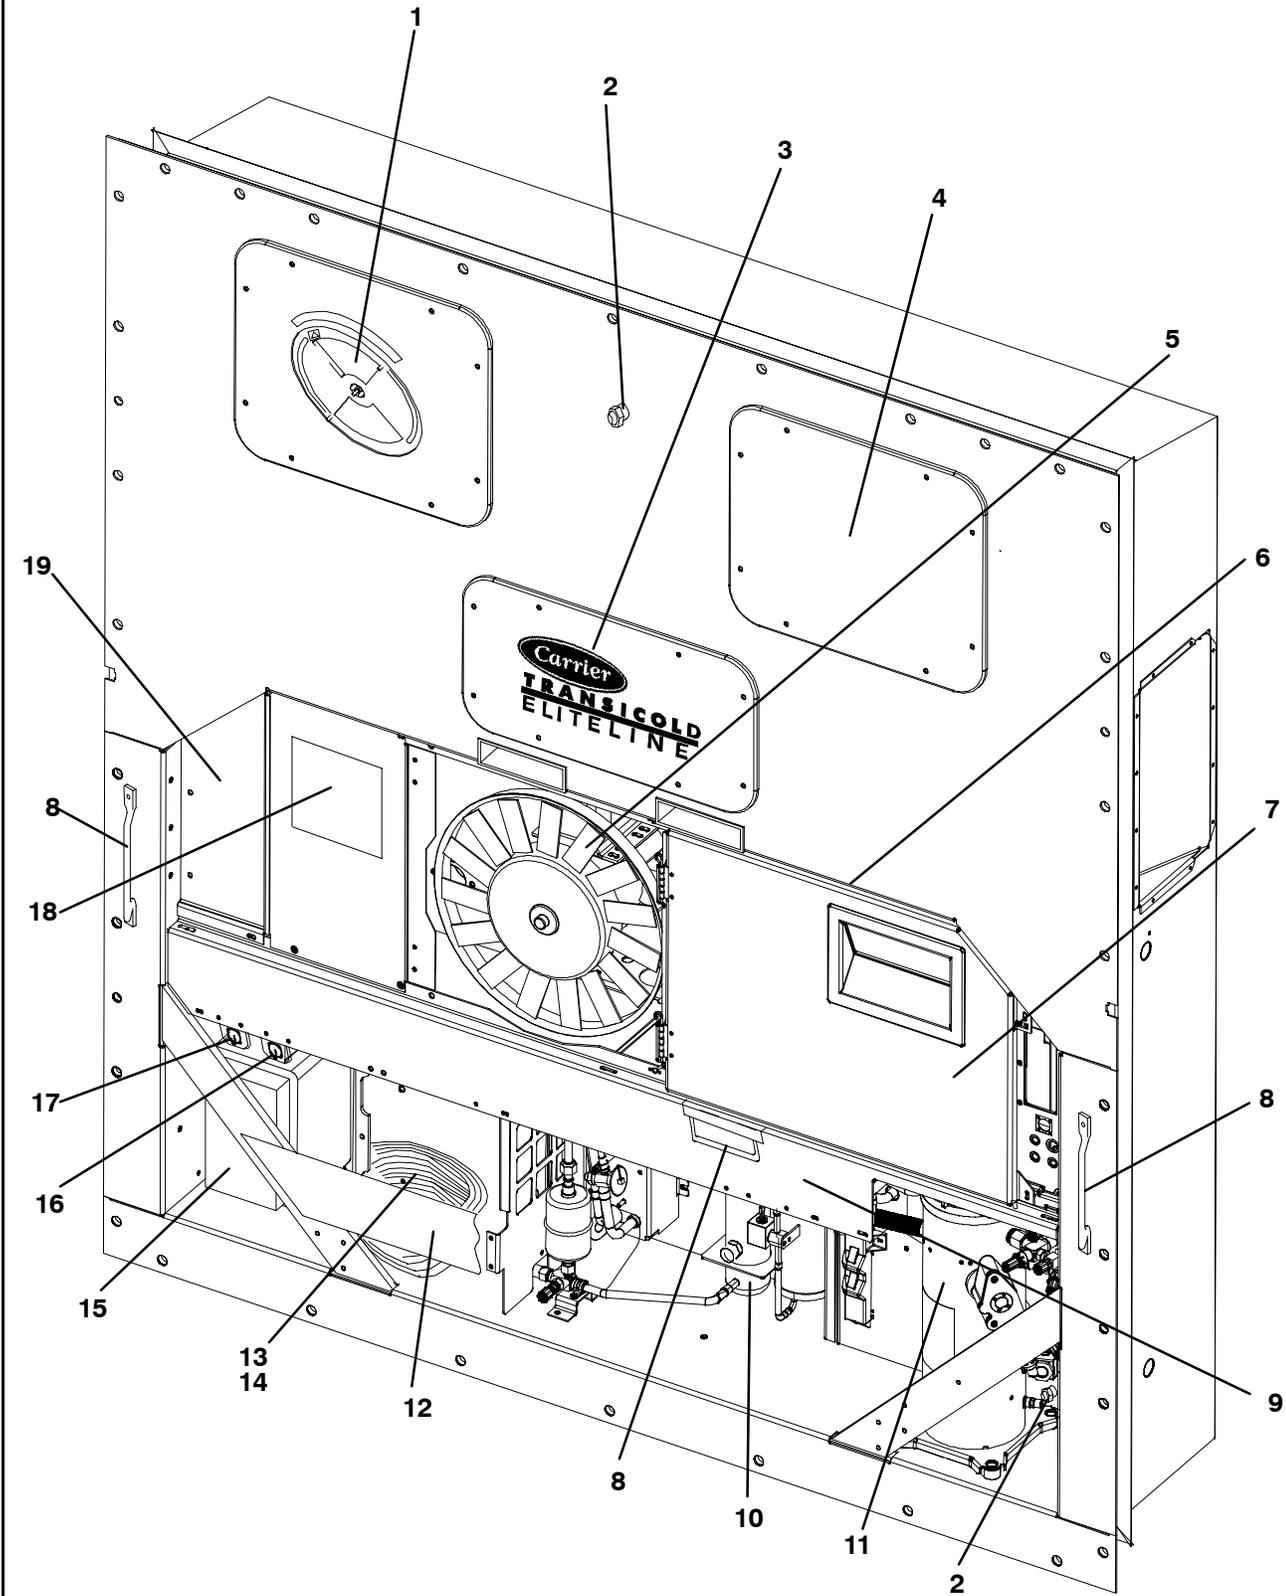

The following letter designations are used to classify parts throughout this list:

- A/R= *As Required*
- N/A= *Not Available*
- NS = *Not shown in illustration*
- NSS = *Not sold separately* - Order next higher assembly or kit
- PID = *Parts Identification Number* - essential to identify unit configuration.
- PL = *Purchase Locally*
- SST = *Stainless Steel* - 300 Series unless otherwise specified.
- SV = *Suffix SV* - added to part number designates service replacement part.
